PAPER 2 CHALLENGES IN THE HUMAN ENVIRONMENT

---

Mark scheme

Additional Specimen

---

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Assessment Writer.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from [aqa.org.uk](http://aqa.org.uk)

## Level of response marking instructions

Level of response mark schemes are broken down into levels, each of which has a descriptor. The descriptor for the level shows the average performance for the level. There are marks in each level.

Before you apply the mark scheme to a student's answer read through the answer and annotate it (as instructed) to show the qualities that are being looked for. You can then apply the mark scheme.

### Step 1 Determine a level

Start at the lowest level of the mark scheme and use it as a ladder to see whether the answer meets the descriptor for that level. The descriptor for the level indicates the different qualities that might be seen in the student's answer for that level. If it meets the lowest level then go to the next one and decide if it meets this level, and so on, until you have a match between the level descriptor and the answer. With practice and familiarity you will find that for better answers you will be able to quickly skip through the lower levels of the mark scheme.

When assigning a level you should look at the overall quality of the answer and not look to pick holes in small and specific parts of the answer where the student has not performed quite as well as the rest. If the answer covers different aspects of different levels of the mark scheme you should use a best fit approach for defining the level and then use the variability of the response to help decide the mark within the level, ie if the response is predominantly Level 2 with a small amount of Level 3 material it would be placed in Level 2 but be awarded a mark near the top of the level because of the Level 3 content.

### Step 2 Determine a mark

Once you have assigned a level you need to decide on the mark. The descriptors on how to allocate marks can help with this. The exemplar materials used during standardisation will help. There will be an answer in the standardising materials which will correspond with each level of the mark scheme. This answer will have been awarded a mark by the Lead Examiner. You can compare the student's answer with the example to determine if it is the same standard, better or worse than the example. You can then use this to allocate a mark for the answer based on the Lead Examiner's mark on the example.

You may well need to read back through the answer as you apply the mark scheme to clarify points and assure yourself that the level and the mark are appropriate.

Indicative content in the mark scheme is provided as a guide for examiners. It is not intended to be exhaustive and you must credit other valid points. Students do not have to cover all of the points mentioned in the indicative content to reach the highest level of the mark scheme.

An answer which contains nothing of relevance to the question must be awarded no marks.

### Assessment of spelling, punctuation and grammar (SPaG)

Accuracy of spelling, punctuation, grammar and the use of specialist terminology will be assessed via the indicated 9 mark questions. In each of these questions, 3 marks are allocated for SPaG as follows:

- **High performance** – 3 marks
- **Intermediate performance** – 2 marks
- **Threshold performance** – 1 mark

Q	Part	Marking guidance	Total marks
---	------	------------------	-------------

**Question 1 Urban issues and challenges**

01	1	1 mark – one point accurately marked and line completed OR both points accurately marked but no line. 2 marks – both points accurately marked and line completed.  AO4 = 2 marks	2
----	---	---	---

01	2	2.8 billion (must have billion)  AO4 = 1 mark	1
----	---	---	---

01	3	Individual points – 1 mark (2 x 1) OR developed point – 2 marks.  Ideas might include: <ul style="list-style-type: none"> <li>• many cities in LICs/NEEs are growing rapidly because of high levels of migration from the countryside to the cities (rural-urban migration) (1). This is mainly due to the opportunities for a higher standard of living/food security/health/education in urban areas (pull factors)(1)</li> <li>• many megacities are major centres of economic activity, including manufacturing industries and services (1), so they attract large numbers of people looking for work often from rural areas, causing the city to grow faster (1)</li> <li>• push factors such as rural unemployment and poor access to services drives people into larger cities in LICs and NEEs (1)</li> <li>• people who migrate to towns and cities tend to be young and so have higher birth rates in that age range (1)</li> <li>• no credit for description of pattern of megacities.</li> </ul> AO3 = 2 marks	2
----	---	---	---

01	4	5665  AO4 = 1 mark	1
----	---	--------------------------	---

01	5	<b>A</b> (2 km)  AO4 = 1 mark	1
----	---	-------------------------------------	---

01	6	<p>Individual points – 1 mark (2 x 1) OR developed point – 2 marks.</p> <p>Ideas might include: quicker way into the city; less stressful; no parking worries; get right into city centre; cheaper. All of which would encourage people to use the bus service so there would be fewer cars and consequently less traffic congestion.</p> <p>AO3 = 2 marks</p>	2

Indicative content

- At the highest level students are expected to show some understanding of the development gap.
- At the lower levels reducing the development gap may be implied by an appreciation of how the development of tourism can create socio-economic opportunities.
- Economic factors considered may include the creation of jobs (direct and through the multiplier); increases in income; opportunity for the development of skills; the development of infrastructure and improvement of services.
- Social opportunities may include the development and improvement of services; the opportunity to improve general living conditions and general improvement to health and welfare.
- Students may include examples where particular tourism developments have included the building of social facilities such as schools; health clinics; water and sanitation systems; electricity systems.

**Question 4 Food**

04	1	<b>Africa</b> AO4 = 1 mark	1
----	---	-------------------------------	---

04	2	1 mark for identification of an area/areas that consume more than 3500 calories per year.  2 <sup>nd</sup> mark for an appreciation of the overall distribution. This might be a reference to the more developed parts of the world or use of named continents to express this.  AO4 = 2 marks	2
----	---	--	---

04	3	1 mark –for identified point  2 <sup>nd</sup> . mark – for some extension of the identified point or some appropriate development.  <u>Indicative content</u>  <ul style="list-style-type: none"> <li>• Malnutrition/starvation/famine.</li> <li>• Specific health issues.</li> <li>• Links to individual/national economic circumstances.</li> <li>• Migration from rural areas.</li> <li>• Civil conflict.</li> </ul> AO2 = 2 marks	2
----	---	--	---

04	4	<b>Level</b> <b>Marks</b> <b>Description</b>		6	
		3 (Detailed)	5–6		AO1 Demonstrates detailed knowledge of the advantages and disadvantages of a specific large scale agricultural development.  AO2- Shows thorough geographical understanding of the advantages and disadvantages of a specific large scale agricultural development.
		2 (Clear)	3–4		AO1- Demonstrates clear knowledge of the advantages and disadvantages of a referenced large scale agricultural development.  AO2- Shows some geographical understanding of the advantages and disadvantages of a referenced large scale agricultural development.

1 (Basic)	1–2	<p>AO1 Demonstrates limited amount of largely generic knowledge of the advantages and disadvantages of a large scale agricultural development.</p> <p>AO2 Shows limited geographical understanding of the advantages and disadvantages of a large scale agricultural development.</p>
	0	No relevant content.

Indicative content

**Advantages**

- Increased food production.
- Increased cash crops (export).
- Cheaper food.
- Improved health.
- Up skilling of workforce.
- Labour freed up for other industry.
- Disadvantages.
- Less jobs in rural areas.
- Increased use of water.
- Need for industrial inputs (imports).
- Breakdown of rural communities.
- Small scale farmers lose their land.
- Problems of pollution.

AO1 = 3 marks, AO2 = 3 marks

**Question 5 Water**

05	1	<p><b>Africa</b></p> <p>AO4 = 1 mark</p>	1
05	2	<p>1 mark for identification of an area/areas that have 100% access to safe water.</p> <p>2<sup>nd</sup> mark for an appreciation of the overall distribution. This might be a reference to the more developed parts of the world or use of named continents to express this.</p> <p>AO4 = 2 marks</p>	2
05	3	<p>1 mark –for identified point</p> <p>2<sup>nd</sup>. mark – for some extension of the identified point or some appropriate development.</p> <p><u>Indicative content</u></p> <ul style="list-style-type: none"> <li>• Increasing use of contaminated water.</li> <li>• Specific health issues.</li> <li>• Links to individual/national economic circumstances.</li> <li>• Impact on farming/industry.</li> <li>• Migration from water shortage areas.</li> <li>• Civil conflict.</li> </ul> <p>AO2 = 2 marks</p>	2
