

CUT
AND
PASTE

IMAGE 1

In this image, I have cut two distinct images into pieces, I chose the two images as they are opposite male and female, like yin and yang. I imagined a monster like created with multiple eyes and a split personality, but works as one. I enlarged and decreased the size of the same image, and put them together to create the creature.

IMAGE 4

I cut shapes such as circles and triangles to create this simple image. I used the same split-personality throughout all of my images. I used enlarged and smaller versions of the same image to create

IMAGE 6

I cut away parts of the face and worked back into the missing parts. The idea with this was to show people mask emotions or missing parts with a false personality.

IMAGE 8

With this image I crumpled up and folded the edges and cut up a different image like a broken mirror. I tried to make this image look as much like a glitch as I could, a glitch showing a split personality for a second.

IMAGE 2

I used a different colour - grey toned to layer up this image. I worked back into image 2 with black pen 'None to create a skin' effect, to give it a doll-like or robotic effect.

IMAGE 5

With image 5, I simply used one image and sliced it into varying sized squares. I left gaps to space out the image, still using the split-personality idea.

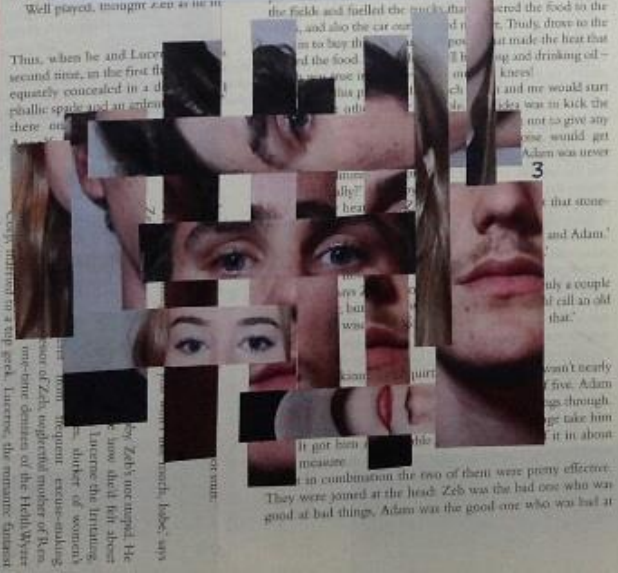

IMAGE 3

I used the idea of tartan or weaving to create this image. The idea behind this was 'conscience or emotion woven' into a person, unable to escape from it. I used varying sizes to add depth.

IMAGE 7

I thought of a 'barcode' throughout this image, and sliced thin strips and layering them up.

access the news. She couldn't really be seen with me, why would she know me? Anyway we'd have to go on way to meet, we were on different things. So we'd fixed up a fallback code when I gave her my cell samp-
