Nuffield Research Placements

Experience Social Science Research in Action

STEM Learning are offering the opportunity to gain key quantitative social science research skills by taking part in a Nuffield Research Placement. Social sciences cover a diverse range of topics, and have a major influence on government policy and population behaviour.

Students are offered their very own research project, working alongside professional social scientists.

Students will also take part in online module assignments designed to develop their essential professional, research, data and numeracy skills

- **Learn new skills**
- **Experience a real job in Social Sciences/STEM**
- **Enhance Personal Statement and CV**
- **Meet experts in your chosen field**
- **Increase Confidence**

Placements in Science, Technology, Engineering and Maths are also available

Throughout my project I was able to talk to my supervisor for guidance and was free to ask any questions if I was ever unsure about anything. The placement was a truly unique experience and being able to carry out a project by myself was an amazing opportunity. I learnt so many skills from this experience and I was given a really interesting project.
