

POST-18 PLANNING AND PREPARATION

Going forward, to compliment Mrs Black's Post 18 Programme, my weekly flyer will contain a mixture of information on Universities/Open Days, Apprenticeships and Work Experience.

University – choosing a course and where to study

As with anything these days, there are a huge number of websites dedicated to finding out about Universities and their courses, listed below are three of the best, allowing you to search and filter in different ways.

These websites will allow you to look at the courses and then find out when the open days are either directly or using another search engine such as [Opendays.com](https://www.opendays.com).

Healthcare Virtual Experiences

Surrey Heartlands NHS - Discover a Career in Health and Social Care

Thursday 22nd April 5.30 – 7.30pm Join the free virtual careers event to find out how to start your career in the NHS or Social Care. Hear from employers and professionals about the roles, career pathways and job opportunities available. Register [here](#).

University of Birmingham - Insight into Paediatric Healthcare Virtual Work Experience Event – Saturday 24th April 9am - 1pm Paediatric case discussions, talks from paediatric health care professionals, life as a university student, work experience advice and more. Register [here](#).

Looking at Apprenticeships and wider careers in general

If you are interested in exploring this route, [RATEMYAPPRENTICESHIP](https://www.ratemyapprenticeship.com) is one of the best websites available at the moment as it allows you to search the whole country by apprenticeship level.

In May we will also be suggesting that you sign up to attend the **Careers and Apprenticeship Show**, more details can be found [here](#).
